# Nod to Aadhaar-based e-KYC for issuing mobile connections

KIRAN RATHEE  
New Delhi, September 30

THE DEPARTMENT OF telecommunications (DoT) has allowed use of Aadhaar number or virtual Aadhaar ID for electronic verification (e-KYC) for issuing mobile connections to individual customers as well as bulk connections.

The use of Aadhaar was stopped in October 2018 following the Supreme Court ruling, which had restricted the use of the unique number by private entities in the absence of a legal provision.

In order to allow use of Aadhaar by private entities like banks and telecom operators on voluntary basis, the government in July 2019 had passed the Aadhaar Amendment Bill. With the passage of the Bill, voluntary use of Aadhaar as proof of identity for opening bank accounts and procuring mobile connections was allowed.

The DoT in its letter dated September 29, 2020 to all telecom operators, has decided that Aadhaar or virtual ID can be used as an alternate process for issuing mobile connections.

"It has been decided by the competent authority that apart from the existing provisions of identifying persons through Aadhaar or virtual ID, the use of mobile telecom services, the Aadhaar based electronic-know your customer (e-KYC) process shall also be implemented as an alternate process for all licensed service areas including Jammu, North East and Assam," the DoT said.

In the e-KYC based process, customer will online authorise Unique Identification Authority of India (UIDAI) through Aadhaar authentication using his/her Aadhaar number or virtual ID and biometric to provide his/her demographic data to the licensee (telecom operator). For the purpose of identification of a person using this process, neither core biometric information nor the Aadhaar number/virtual ID of the person shall be stored by the li-

cence or its authorized point of sale (POS)/DoT said. As per the licence conditions, the telecom operators are allowed to appoint or employ franchisee, agents, distributors and employees for the provision of the services by them. The operators are required to keep control over them and the operators should be liable for actions done by its franchisee, agents, distributors and employees in the provision of services.

The telecom operators are required to maintain the details including complete address and all of its POS along with their corresponding agents. The entire process should only be used through the authenticated application (App) hosted by the telco. The access of the app should be controlled by the telco and it should be ensured that the same is not used by unauthorized persons. The app shall be used through login ID and password-controlled mechanism given by the telco to its POS.

After verification of the authorised POS agent by the telco on the basis of demographic data received from UIDAI, the customer acquisition form (CAF) should be populated by the telco in read-only and un-editable form.

Other conditions of e-KYC through Aadhaar include capturing live photograph of the customer. For a customer who wants to get a new mobile connection but if the permanent and local addresses are different, the customer has to give mobile number of a local person and only after verification of the person, the SIM may be delivered.

## PUNJAB & SIND BANK (A Government of India Undertaking)

Appendix - IV Rule 8(1) Possession Notice (FOR IMMOVABLE PROPERTY)

## Volatile coking coal market fluctuating cost of steel output

INDRANIL ROYCHOWDHURY  
Kolkata, September 30

A VOLATILE COOKING COAL market has been causing fluctuations in the charges of steel-making with imported coking coal prices hovering between \$80 and \$200 per tonne free on board (FOB) in the last few months. AK Singh, chairman of state-run Rashtriya Seng Nigam (RINL) said the expenditures on amount of coking coal at RINL stood at ₹5,90 crore in FY20, coming down from ₹5,20 crore the previous year. While in FY19 the expenditure incurred on coking coal increased by ₹121 crore over the expenses in FY18, in FY20 it was lower by ₹688 crore.

Average FOB price of imported hard coking coal was \$165 per tonne in FY20, down from \$192.67 per tonne in FY19. Hard coking coal prices reached its peak in FY18 at \$200.36 per tonne, up from \$152.66 per tonne in FY17. The highest jump in prices occurred in FY17 after it reached \$152.66 per tonne from \$86 per tonne in FY16.

Australian hard coking coal spot prices rose from \$150 per tonne to \$165 per tonne early this year but the Australian government's export prices to settle at \$126 per tonne this fiscal year. This would be a 10 per cent increase over the Indian imports to some extent.

"India imported 52 mt coking coal in FY20, of which 37 mt was sourced from Australia. But the requirement may reach 192 to 161 mt for coking steel furnace and 31 mt for pulverised coal injection (PCI)—when steel production reaches 300 mt in 2030. The steel demand in India has been estimated to go up to 400 mt in 2030, said Singh. The price of coking coal required for PCI, the technology used for reducing steel production cost, went up from an average of ₹61 per tonne in FY16 to \$126 in FY19 and came down to \$101 in FY20. Singh said to reduce the cost of steel production in blast furnace, coke has to be reduced and the level of PCI has to increase from 180 to 200 kg per tonne of hot metal production.
